

REPORT ON PAPER BAG MAKING ACTIVITY

"Never doubt that a small group of thoughtful committed citizens can change the world; indeed, it's the only thing that ever has."

Taking this thought forward, students of Class II participated in the "Paper Bag Making Activity" organised by the School on April 22, 2021. The objective of the activity was to indulge students in the habit of up-cycling a waste product and teaching them how to make paper bags which can be used to carry or pack small articles in it. They were also briefed about the threat that use of plastic bags pose on the environment. The students were made to realise that alternative ways of saving resources can help us save the mother earth. Students were quite enthusiastic about the whole activity. They made very attractive bags with the beautiful quote "NEVER REFUSE TO REUSE". This initiative taken up by the school is sure to hit the right spot in an individual's mind and make them more conscious and teach them better ways to Say no to plastics and yes to biodegradable alternatives.
